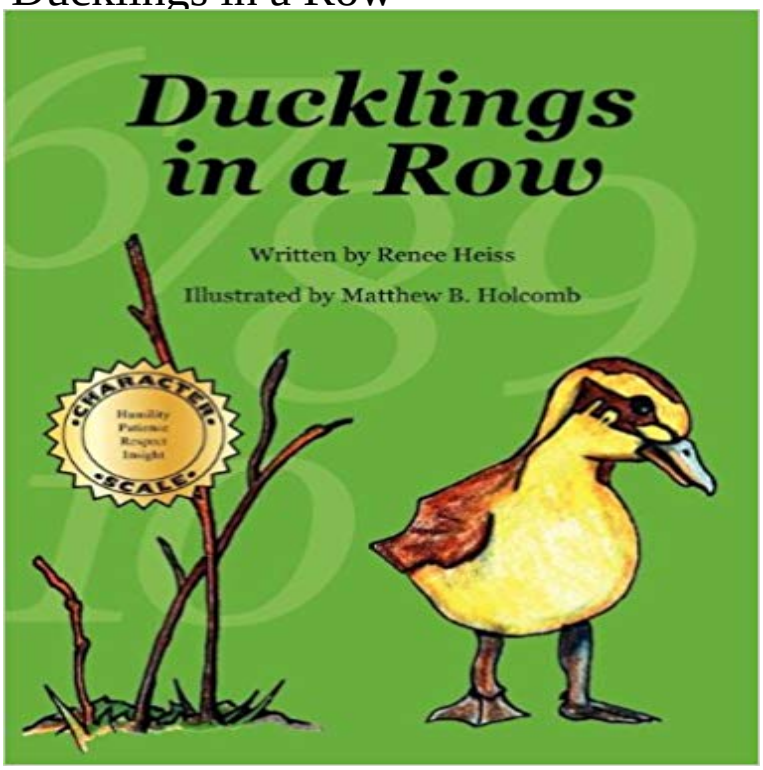
Ducklings in a Row



When Mama Duck asks her ducklings to arrange themselves from One to Ten, the baby ducks learn much more than sequencing skills. In Ducklings in a Row, ten unique duckling personalities combine to form a humorous look at ordinal numbers and at the art of getting along with others. This book nurtures the characteristics of humility, patience, respect, and insight in children aged 4 to 9 years. It also includes a teachers guide with critical thinking questions, related concepts for discussion, a vocabulary list, and references for further learning.
