

The key drivers of innovation in the field of chassis systems are measures to improve vehicle dynamics and driving safety, efforts to reduce fuel consumption, and intelligent development methods. In addition, chassis development is focusing on enhancing ride comfort while also improving NVH characteristics. At the same time, modularization strategies, concepts for the electrification of the powertrain, and steps towards greater system connectivity are making increasingly complex demands on the chassis and its development. Developers are being called upon to respond to these challenges with a variety of solutions.

Plays of Three Decades: Thunder Rock / Jeb / Shadow of Heroes, Uninvited Guests: Invisible Creatures Lurking in Your Home (Tiny Creepy Creatures), Meet the ANZACs, Gemba Walks, GCSE Biology AQA 10-Minute Tests (including Answers), Hammerhead vs. Bull Shark (Who Would Win?),
