

The Guy On The Bike: Lessons in life I learned while riding my bike

The true story of a man who started cycling in his late 20s and went on to do what no other athlete in history has done: setting world records in four consecutive decades! From his earliest rides on his tricycle alongside his grandfather, to his last agonizing 24-hour indoor track world record: the many stories unfold before ones eyes. What makes this story even more compelling is the fact that The Guy On The Bike never used any performance-enhancing drugs during his cycling career. The Babyboomer generation had the book *The Little Engine That Could*, while they were in their childhood years. Now comes the modern and true version of its same premise: Believing in ones self and not giving up! For the cost of a cup of coffee, you parents can give your children a book that will guide them through a real-life story of a man who had BIG dreams-and through perseverance, rising after every defeat and always believing in himself, would go on to realize those dreams! The Little Engines mantra of I think I can, has evolved to Yes, I can! for the young readers of this book.

My First Bike Ride: Life Lessons Learned - YouTube Im 29 years old, and last week I learned how to ride a bike. Yes, for Thats the first and most important lesson. With so many other things in life being much less black-or-white, we can create easy excuses for ourselves.
