

Curious Critters

Photographer David FitzSimmons turns his camera on a variety of animals common throughout North America. **CURIOUS CRITTERS** presents stunning images of everyday animals, including a red flat bark beetle, an Eastern spiny softshell turtle, a spotted salamander, and many other intriguing creatures. Each Curious Critter is photographed against a white backdrop, showcasing the animals colors, textures, and shapes with precision and clarity. Along with each photo is an entertaining and educational vignette, told from the critters perspective: a bush katydid explains her bubblegum-pink color, a poetic opossum opines upon her often-shortened name, and a far-from-modest black swallowtail butterfly lets readers in on her secret for avoiding predators. Young boys and girls will delight in these colorful critters and their tales
