

# National Geographic Investigates: Extreme Weather: Science Tackles Global Warming and Climate Change (National Geographic Investigates Science)

Huge hurricanes, devastating droughts, ferocious blizzards. What's going on? Scientists around the globe are focusing on extremes of weather, both past and present. Join the weather scientists who are using modern technology, including satellites and supercomputers, to produce a weather forecast for Earth's future. Extreme Weather gives readers the experts' views and highlights the climate changes that may be on the horizon. National Geographic supports K-12 educators with ELA Common Core Resources.
