

Foxes After Dark (Animals of the Night)

Foxes, like other nocturnal canines, do their hunting and playing after dark. Through informational text and full-color photos, readers will learn what foxes eat, how they hunt, how they raise their cubs, and if they have any natural predators. In addition, a Words to Know at the beginning of the book helps readers understand new vocabulary they will come across in the text, and safety tips at the end of the book will inform them how to stay safe if they ever encounter a fox.

Which animals do you hear at night? - Country Life Urban fox looking into house at night Bristol UK. Standing at the edge of a wood in the dark, its easy to spook yourself.
