

High Resolution XPS of Organic Polymers: The Scienta ESCA300 Database

Definitive handbook of high resolution xps spectra of over one hundred organic polymers. Provides the full spectral information--survey and core regions (with fitted components), shake-up spectra, valence band and, in some cases, Auger spectra. All the data are parameterized and tabulated. Complete details of sample preparation are given. Instrument performance and operating conditions are extensively documented. Complete with introductory section and comprehensive appendices. Easy-to-use landscape format.
