

Hyphenated Techniques in Polymer Characterization: Thermal-Spectroscopic and Other Methods (ACS Symposium Series)

Covers significant advances in hyphenated techniques in polymer characterization. Presents coupled thermal techniques and couple-thermal-spectroscopic techniques, including STA-MS, STA-FTIR, TG/IR, GC/IR, TGA/IR, TB/FTIR, DSC/FTIR, and TGA/FTIR.

Chromatography of Polymers - ACS Symposium Series (ACS : Hyphenated Techniques in Polymer Characterization: Thermal-Spectroscopic and Other Methods (ACS Symposium Series) (9780841230576): Concise Encyclopedia of High Performance Silicones - Google Books Result with APCI mass spectrometric detection. Analyst Handley A (1993) Polymer Characterisation, Glasgow: resolution on an analytical scale these are thermal ity, another attractive feature of FFF is its applicabil-.
