

## Lean Accounting DVD (Manufacturing Insights)

Part of SMEs award winning Manufacturing Insights video series, this DVD presents an instructional documentary on the role of lean accounting in the creation of a lean enterprise. It demonstrates how lean financial management can become an agent of positive change for an organization by producing data that enhances continuous improvement. A valuable tool for introducing lean principles into a traditional accounting environment, it demonstrates how finances can be handled with fewer transactions, particularly through the use of value stream costing methods. The video features input from managers who have successfully implemented lean procedures. Brian Maskell, founder and president of BMA Inc., an international consulting firm that specializes in introducing lean thinking to manufacturers and distributors Orry Fiume, vice president of finance and administration at Wiremold, a company he helped transform into a world leader in lean business management.
