

Explore wildlife in this book of nature photography as I wander through the trails around my neighborhood. You will find photos of a lightning bug and a soldier beetle, a fishing spider and a harvestman, a rat snake and a yellow-bellied slider, a centipede and a millipede, a carpenter ant and a wasp, a tree frog and a toad, a dragonfly and a butterfly, and more wildlife that will make your children say "Wow!" Your child will love my photos as you read aloud with them on the porch or in the living room. Enjoy the questions they ask as you both learn four interesting facts about so many living creatures. If you are a parent who wants to encourage questioning and wonder, then this is the book for you. It will make your child want to go outside and explore.
