

Photochemistry: Volume 43 (Specialist Periodical Reports)

Drawing on the wealth of photochemical research, this volume combines reviews on the latest advances in the field with specific topical highlights. With critical review chapters devoted to solar energy conversion, cryogenic matrices and polymers and highlights covering for example continuous flow photochemistry and photoactive cyclodextrin-based nanosystems, this volume captures the literature in an authoritative digest of the latest developments in this established field. Relevant to a wide range of academic and commercial disciplines and covering chemistry, physics, biology and technology, this series is essential reading for postgraduates, academics and industrialists working in the field of photochemistry.

Photochemistry - Google Books Result A. Albini and E. Fasani, RSC Publishing, London, 2013, vol. in Photochemistry, A specialist Periodic Report, The Royal Society of Chemistry, 2016, vol.43, p.
